# LAMBDA ALL THE WAY DOWN

Paul Lyons, *Serverless Ambassador*

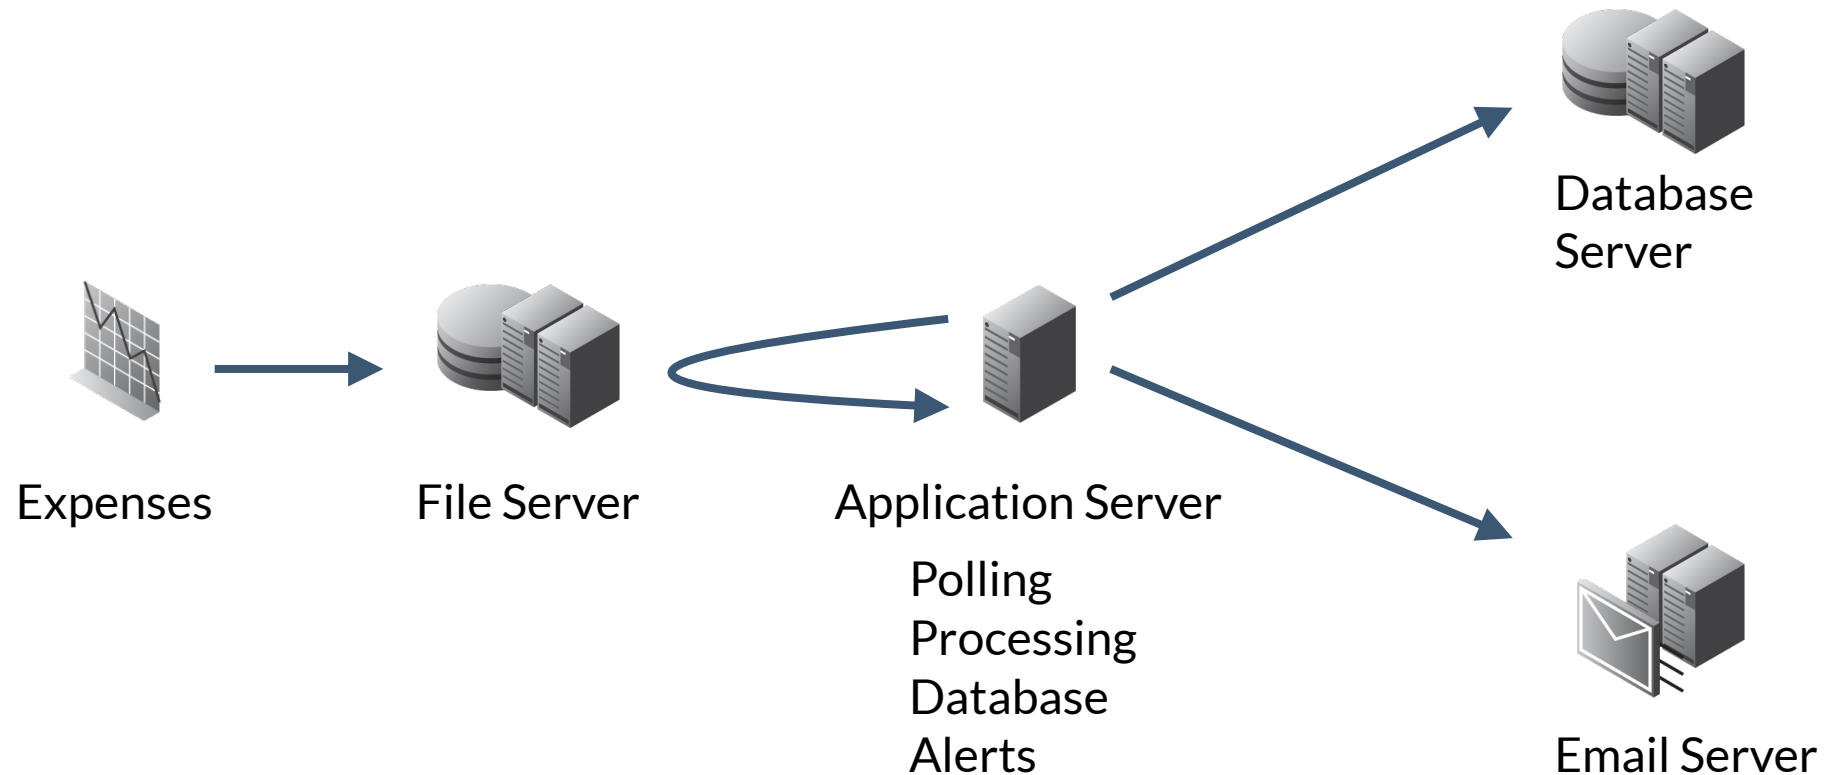

AWS Community Day, Mar 2018

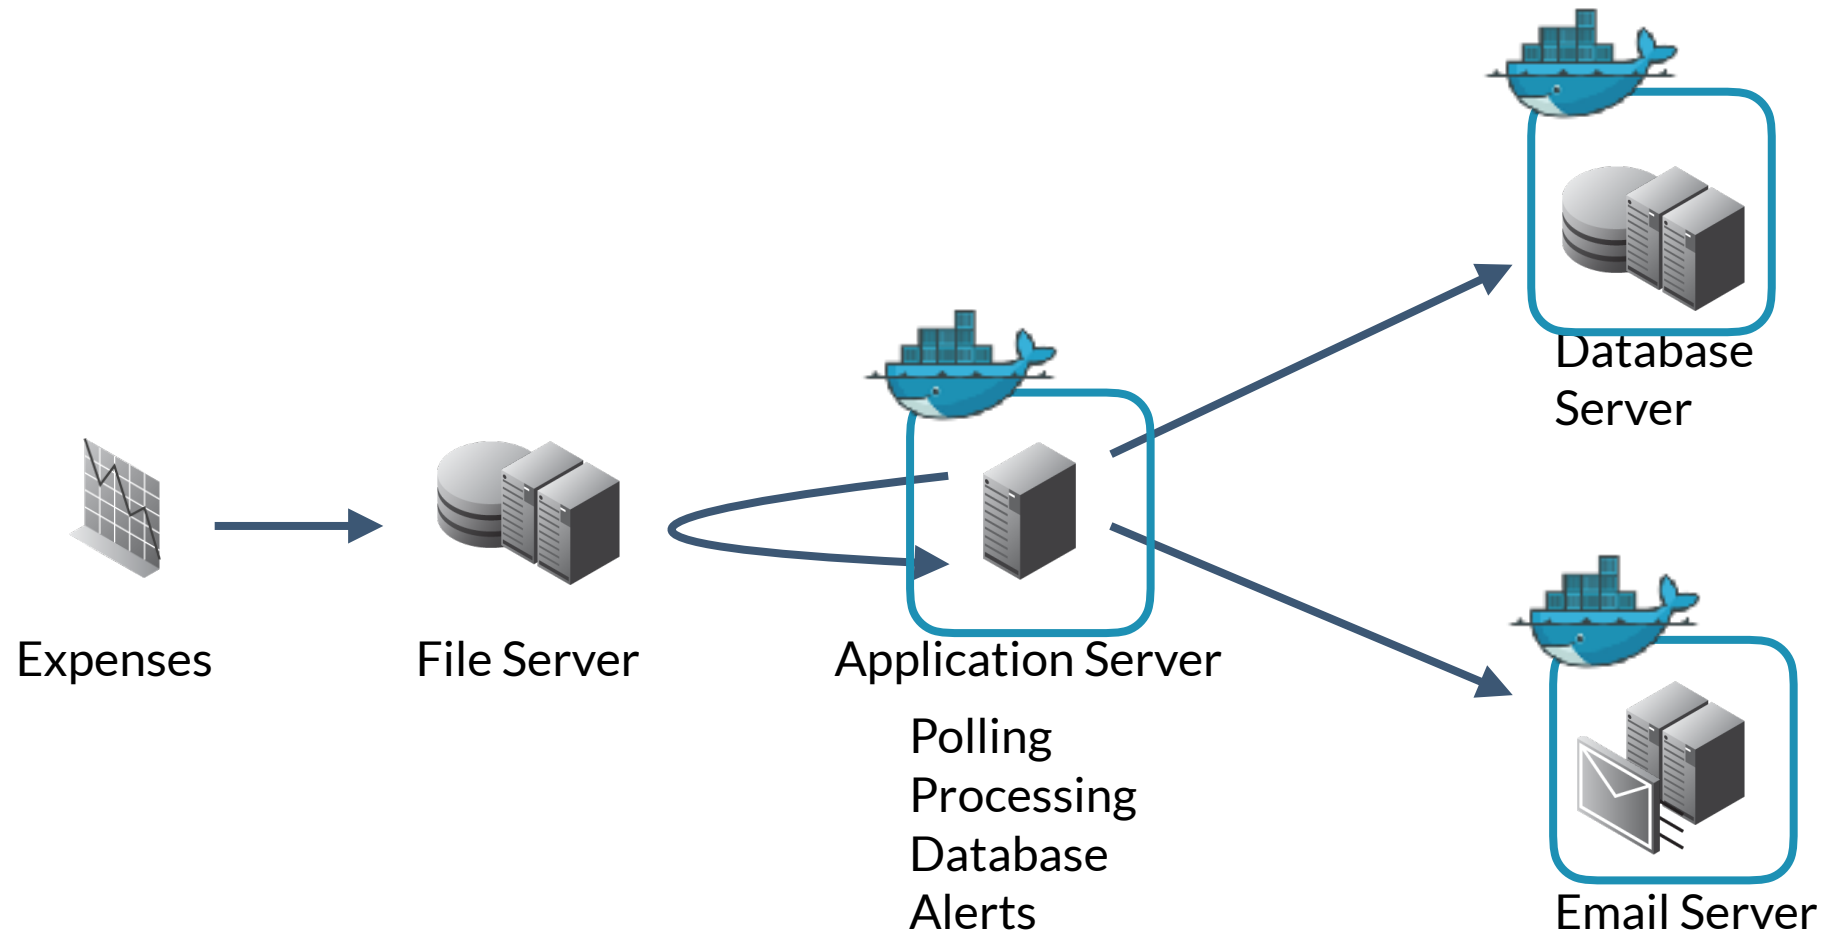

# FROM THE MORNING

# AN 'OLD SKOOL' APP

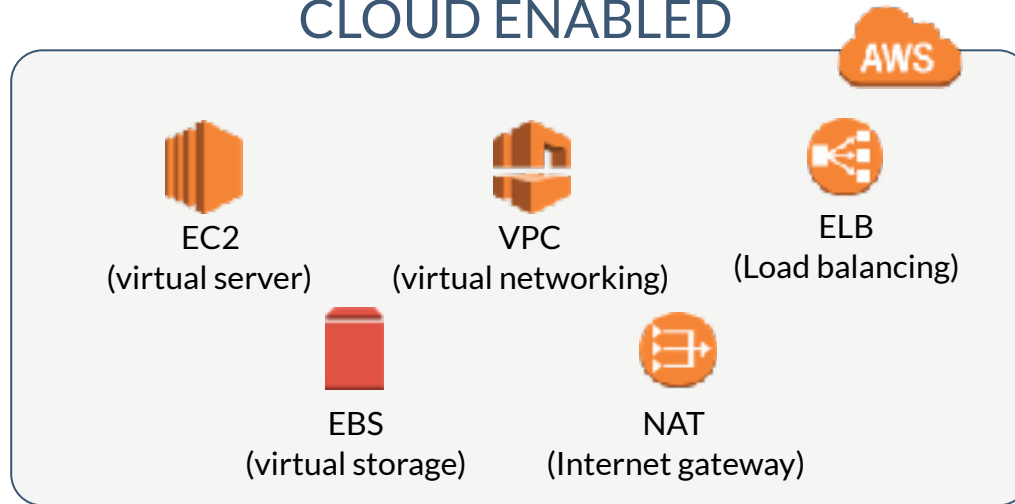

# WE CAN CONTAINERISE

But we still need to manage servers, networks, versions, security etc

# 50%-80% LOWER COSTS WITH CLOUD NATIVE

## CLOUD ENABLED

## SERVER / INFRA FOCUS

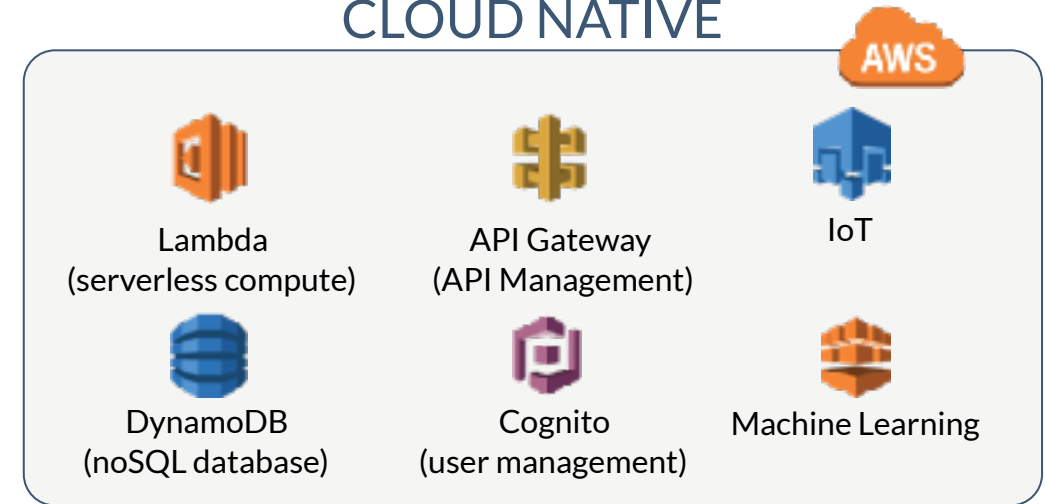

Self-service provisioning of server infrastructure

Provisioned in minutes

Install and maintain higher level abstractions

Plan and implement reliability / scalability

## CLOUD NATIVE

## SERVICE FOCUS

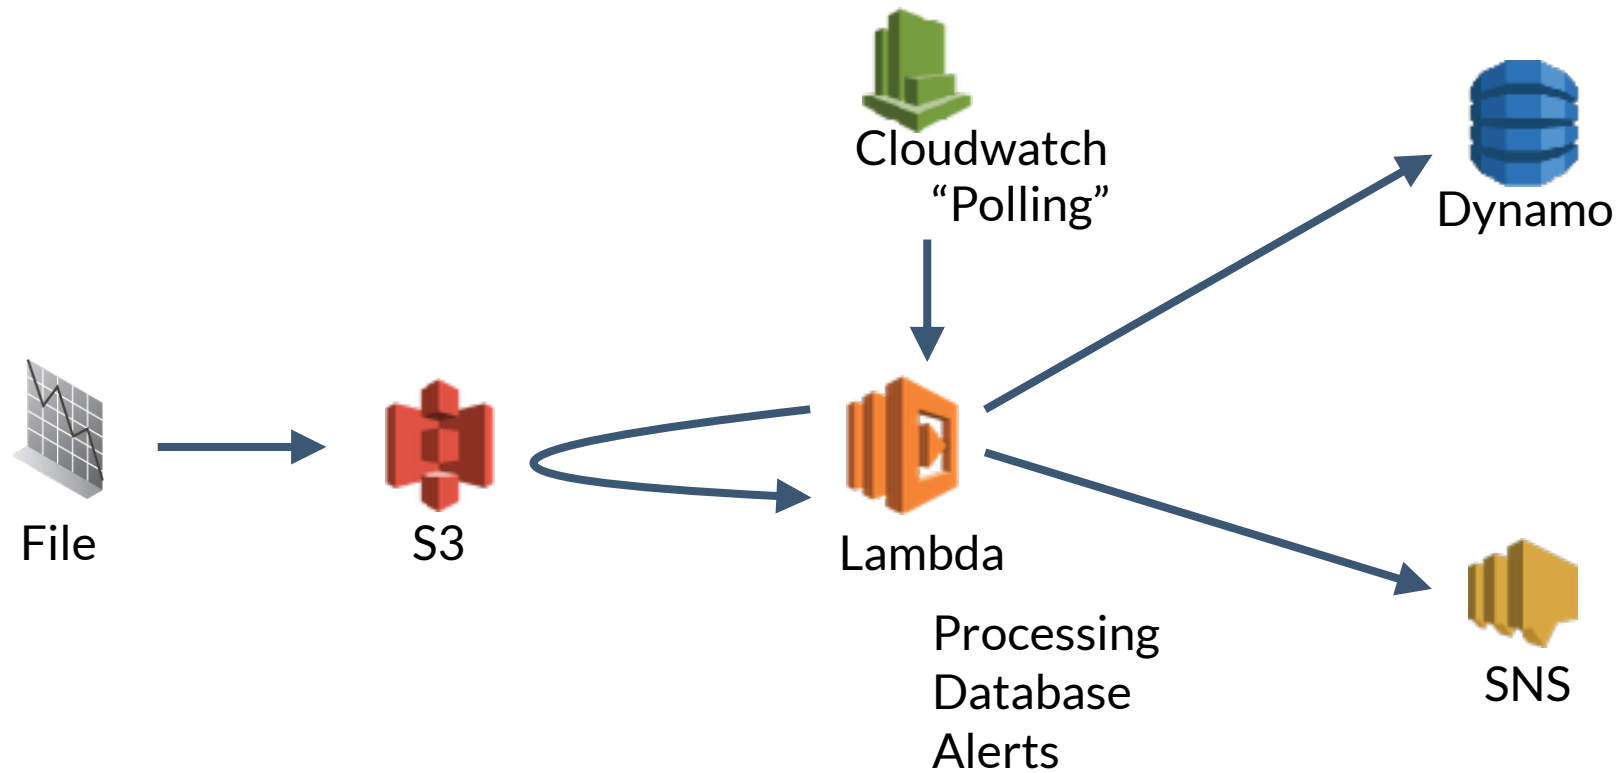

Self-service provisioning of high level abstractions

Provisioned in seconds

Reliability / Scalability built-in

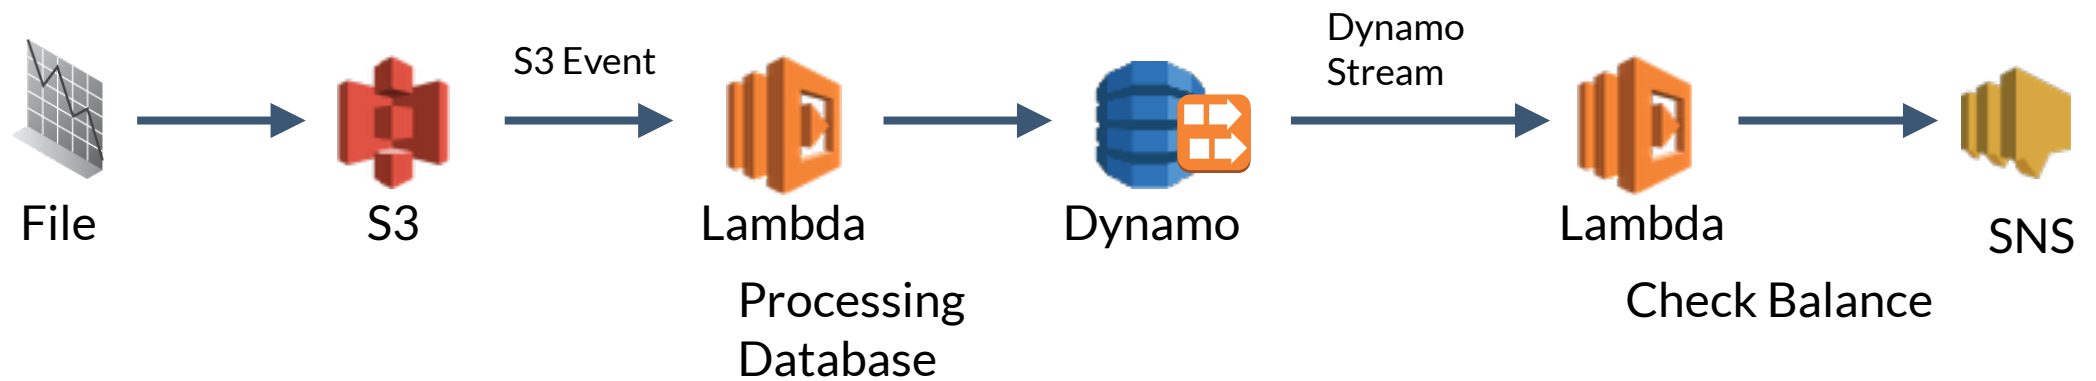

= 50%-80% SAVINGS IN DEV AND INFRA COSTS

# A SERVERLESS MONOLITH

We still have a bit of a monolith

# SERVERLESS WITH EVENTS

Now we're cooking

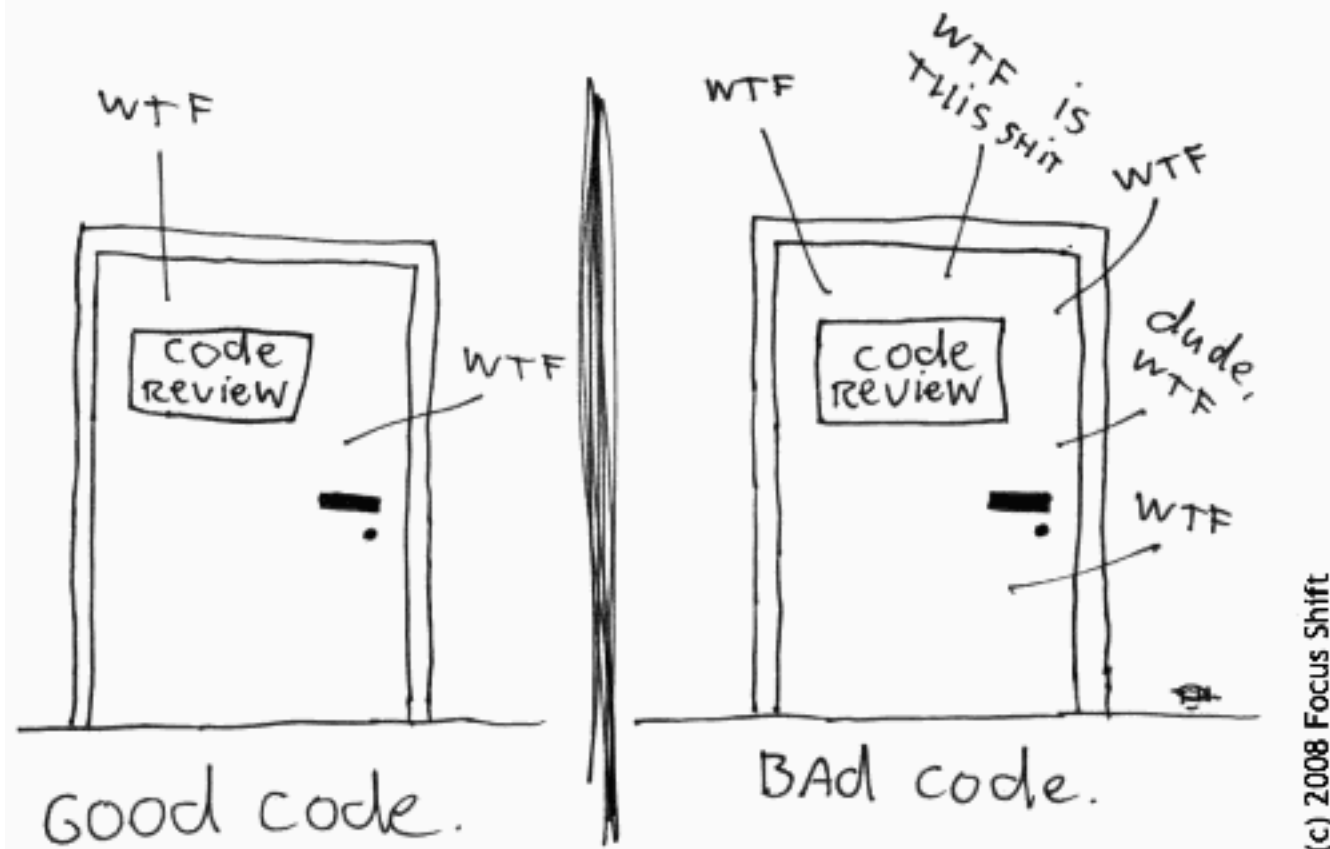

# TIME FOR SOME CODE

<https://github.com/nordcloud/lambdas-presentation-2018>

The ONLY valid measurement  
of code quality: WTFs/minute
